

Gary Hyde

Senior Software Engineer, AI Operations Winter Garden / Orlando, FL I

gary.robert.hyde@gmail.com | (407) 473-7206 | jobs.garyhyde.com/rapidsos/senior-software-engineer-ai-operations

Summary

Full-stack TypeScript/Node engineer who takes ideas to production independently, with AI agents as the engine. I work daily in Claude Code, Cursor, and Copilot, building agents, tools, and automations and shipping production code with them rather than around them. The clearest example is the team-facing review system I built that fans a diff out to multiple AI models and synthesizes their findings into one structured Ship/Fix/No-Ship scorecard. 10+ years of full-stack experience let me wire LLMs and agents into real infrastructure: APIs, data layers, queues, and webhooks. I run almost entirely autonomous and async, scoping ambiguous problems and carrying them from idea to production on my own. Remote-first by habit, biased toward clean code, automation, and shipping.

Core Skills

TypeScript / Node.js (full-stack), AI agents, tools, and automations, LLM integration, Claude Code, Cursor, GitHub Copilot, agent workflows, automated AI code-review tooling, multi-model output synthesis, prompt engineering, idea-to-production independent delivery, REST APIs, PostgreSQL, Redis, BullMQ, webhook architecture, Next.js 14 (App Router), React, Express, autonomous async delivery, Git

Experience

SENIOR FULL-STACK DEVELOPER, FORWARD THINKING MARKETING (CHRONIC GURU)

Oct 2023 - May 2026

- Built and shipped AI agents and automations into production, including automated code-review tooling that fans a diff out to multiple AI models and synthesizes their outputs into one structured Ship/Fix/No-Ship scorecard.

- Set the team's AI-native standard, making Claude Code and Cursor the default way to build and designing the agent workflows that compressed feature delivery while holding code quality.
- Took features from idea to production independently, working async across a multi-developer environment without waiting on direction.
- Architected and maintained multi-system integrations across order pipelines and inventory sync, automating data flow and resolving complex cross-platform bugs at the data layer.
- Designed a custom Git commit convention (Mission Codes) for multi-developer cloud environments, improving traceability and reducing friction across the team.
- Investigated and authored a detailed multi-system stock-overselling incident report, tracing a critical inventory bug to root cause across two platforms.

LEAD DEVELOPER, GARY HYDE DEVELOPMENT (INDEPENDENT)

Jan 2013 - Present

- Built multi-tenant SaaS platforms on Next.js 14 App Router and TypeScript with Express, PostgreSQL, BullMQ/Redis job queues, and Auth.js v5, taken from idea to production solo.
- Built agent-ready development workflows around Claude Code, structuring tasks so AI agents could drive real implementation end to end rather than just autocomplete.
- Designed REST APIs, database schemas, and background-job systems, the infrastructure AI agents, tools, and automations run against in production.
- Delivered full-stack solutions across e-commerce, hospitality, professional services, and SaaS, owning scope, architecture, and delivery entirely on my own.

CO-OWNER / E-COMMERCE OPERATOR, POSH LOVE

Feb 2015 - Present

- Co-founded and run a custom-product e-commerce business, owning the storefront, infrastructure, fulfillment, and marketing end to end.

WEB DEVELOPER, AAA (CONTRACT)

Aug 2012 - Jan 2013

- Diagnosed and resolved bugs in a next-generation roadside-assistance dispatch platform alongside the QA team.

Notable Projects

PATHARA, AI AGENT JOB-SEARCH PLATFORM (GETPATHARA.COM)

A self-service product where candidates submit a resume and questionnaire, and an automated Claude API agent pipeline returns ranked job matches with a tailored resume, cover letter, and interview prep for each match, plus an application tracker.

- **Stack:** Next.js (App Router), TypeScript, Vercel, Supabase (auth, Postgres with row-level security, storage), Claude API Managed Agents, PostHog
- **Highlights:** Built the full pipeline end to end, with per-candidate data isolation, per-run cost and token telemetry, and a managed-agent design that runs without self-hosted workers

MULTI-MODEL AI CODE-REVIEW TOOLING

A review system that fans a diff out to multiple AI models and synthesizes their findings into one structured scorecard with a Ship/Fix/No-Ship verdict.

- **Stack:** Claude Code, Cursor, multi-model orchestration, structured scorecard output
- **Highlights:** Turned ad-hoc AI review into a repeatable, auditable automation that raised the bar for the whole team

TEETIMES, MULTI-TENANT SAAS BOOKING PLATFORM

OpenTable-inspired tee-time booking SaaS for golf country clubs, built engine-first with a multi-tenant architecture and a Claude Code agent-ready workflow.

- **Stack:** Next.js 14 App Router, TypeScript, React, Express, PostgreSQL, BullMQ + Redis, Zod, Tailwind CSS
- **Highlights:** Redis-backed background jobs, multi-tenant data isolation, and a TDD task structure that AI agents could drive

Education

B.S. Web Design and Development, Full Sail University A.S. Computer Programming, Valencia Community College
