

Gary Hyde

Senior Product Engineer Winter Garden / Orlando, FL | gary.robert.hyde@gmail.com | (407) 473-7206 | jobs.garyhyde.com

Summary

Product engineer who owns features end to end, from the PostgreSQL schema through the API to the React interface a user actually touches, in one continuous TypeScript stack. 14+ years building production web products, including multi-tenant SaaS platforms I architected for scale from day one. I work TypeScript everywhere, design REST APIs and data models, run Redis-backed background jobs, and carry the work all the way to a polished, performant frontend, owning every layer myself. I am most effective with deep autonomy and almost no meetings: hand me a product problem and a doc and I scope it, build it, and ship it. I have built AI into my daily workflow since the tools became usable, using it as a force multiplier across the whole stack while keeping quality high. That fit is not abstract for me: I built Pathara, an AI product that runs the job search for candidates, so Ashby's all-in-one recruiting platform with AI embedded in every layer is exactly the kind of product I want to help build.

Core Skills

TypeScript, React, Node.js, Express, REST APIs, PostgreSQL, schema design, Redis, BullMQ, webhook architecture, end-to-end product ownership, Next.js 14 (App Router), Drizzle ORM, Auth.js v5, Zod, Tailwind CSS, shadcn/ui, autonomous async delivery, AI-native development, automated code-review tooling, multi-model output synthesis, prompt engineering, Git, Vercel, Railway, Docker-style cloud deploys

Experience

SENIOR FULL-STACK DEVELOPER, FORWARD THINKING MARKETING (CHRONIC GURU)

Oct 2023 - May 2026

- Lead developer owning the full technical stack, from PostgreSQL schema and REST API design through the React tooling and the storefronts running on top of it.
- Took features from idea to shipped with minimal oversight, scoping the work, building both the API and the React interface, and owning the outcome end to end.

- Set the team's AI-native development standard, introducing AI as the default way to build and sharply compressing feature delivery while holding code quality and documentation high.
- Built and shipped automated AI code-review tooling that synthesizes outputs from multiple models into structured Ship/Fix/No-Ship scorecards, raising the team's human-in-the-loop review bar.
- Designed a custom Git commit convention (Mission Codes) for multi-developer cloud environments, improving traceability and reducing friction across the team.
- Architected and maintained multi-system integrations across order pipelines and inventory sync, resolving complex cross-platform bugs at the data layer where consistency mattered most.

LEAD DEVELOPER, GARY HYDE DEVELOPMENT (INDEPENDENT)

Jan 2013 - Present

- Built multi-tenant SaaS platforms on Next.js 14 App Router and TypeScript with Express, PostgreSQL and Drizzle ORM, BullMQ/Redis job queues, and Auth.js v5, production-architected and cloud-deployed from day one.
- Designed REST APIs, database schemas, and background-job systems end to end in one TypeScript stack, then carried them through to performant React frontends, owning every layer myself.
- Worked fully independently across a varied client base, owning scope, architecture, timelines, and delivery on my own with almost no meeting overhead.
- Developed a direct booking platform with guest-facing portals, Stripe + Stripe Tax integration, webhook handling, and review workflows.

CO-OWNER / E-COMMERCE OPERATOR, POSH LOVE

Feb 2015 - Present

- Co-founded and run a custom-product e-commerce business, owning the storefront, infrastructure, fulfillment, and marketing end to end.

WEB DEVELOPER, AAA (CONTRACT)

Aug 2012 - Jan 2013

- Diagnosed and resolved bugs in a next-generation roadside-assistance dispatch platform alongside the QA team.

Notable Projects

PATHARA, AI AGENT JOB-SEARCH PLATFORM (GETPATHARA.COM)

A self-service product where candidates submit a resume and questionnaire, and an automated AI agent pipeline returns ranked job matches with a tailored resume, cover letter, and interview prep for each match, plus an application tracker. The same AI-for-hiring space Ashby builds in, approached from the candidate side.

- **Stack:** Next.js (App Router), TypeScript, Vercel, Supabase (auth, Postgres with row-level security, storage), managed AI agents, PostHog
- **Highlights:** Built the full pipeline end to end, with per-candidate data isolation, per-run cost and token telemetry, and a managed-agent design that runs without self-hosted workers

TEETIMES, MULTI-TENANT SAAS BOOKING PLATFORM

OpenTable-inspired tee-time booking SaaS for golf country clubs, built engine-first with a multi-tenant architecture.

- **Stack:** Next.js 14 App Router, TypeScript, React, Node.js, Express, PostgreSQL + Drizzle ORM, Auth.js v5, BullMQ + Redis, Zod, Tailwind CSS, shadcn/ui
- **Highlights:** One TypeScript stack from schema to UI, Redis-backed background jobs, multi-tenant data isolation, and an AI agent-ready workflow with a TDD task structure driving the build

MULTI-MODEL AI CODE-REVIEW TOOLING

A team-facing review system that fans a diff out to multiple AI models and synthesizes their findings into one structured scorecard with a Ship/Fix/No-Ship verdict.

- **Stack:** Multiple AI models, multi-model orchestration, structured scorecard output
- **Highlights:** Turned ad-hoc AI review into a repeatable, auditable workflow that raised the bar for the whole team

Education

B.S. Web Design and Development, Full Sail University A.S. Computer Programming, Valencia Community College
