

Gary Hyde

Full-Stack Software Engineer Winter Garden / Orlando, FL | gary.robert.hyde@gmail.com | (407) 473-7206 | jobs.garyhyde.com

Summary

Full-stack engineer who lives in exactly this stack: Node.js and TypeScript on the server, PostgreSQL underneath, React on top, deployed to the cloud. 14+ years building production web products, including multi-tenant SaaS platforms I architected for scale from day one. I design REST APIs, model database schemas, and run Redis-backed background jobs, then carry the work all the way through to performant React frontends, owning every layer myself. On top of that I build with LLM and agent tooling in earnest: I have built AI into my daily workflow since the tools became usable and have shipped team-facing AI tooling that fuses multiple model outputs into structured review scorecards. Remote-first and self-directed by habit, biased toward clean code, autonomous ownership, and shipping.

Core Skills

Node.js, TypeScript, React, PostgreSQL, Express, REST APIs, schema design, AWS-style cloud deploys, Redis, BullMQ, webhook architecture, LLM and agent tooling, AI-native development, automated code-review tooling, multi-model output synthesis, prompt engineering, Next.js 14 (App Router), Drizzle ORM, Auth.js v5, Zod, Tailwind CSS, shadcn/ui, autonomous end-to-end ownership, async collaboration, Git, Vercel, Railway, Docker-style deploys

Experience

SENIOR FULL-STACK DEVELOPER, FORWARD THINKING MARKETING (CHRONIC GURU)

Oct 2023 - May 2026

- Lead developer owning the full technical stack in Node and TypeScript, from PostgreSQL schema and REST API design through the React tooling running on top of it.
- Set the team's AI and agent-tooling standard, introducing AI into the team's default way to build and sharply compressing feature delivery while holding code quality and documentation high.

- Built and shipped automated LLM code-review tooling that fans a diff out to multiple AI models and synthesizes their findings into structured Ship/Fix/No-Ship scorecards, raising the team's human-in-the-loop review bar.
- Designed a custom Git commit convention (Mission Codes) for multi-developer cloud environments, improving traceability and reducing friction across the team.
- Architected and maintained multi-system integrations across order pipelines and inventory sync, resolving complex cross-platform bugs at the data layer where consistency mattered most.
- Investigated and authored a detailed multi-system stock-overselling incident report, tracing a critical inventory bug to root cause across two platforms.

LEAD DEVELOPER, GARY HYDE DEVELOPMENT (INDEPENDENT)

Jan 2013 - Present

- Built multi-tenant SaaS platforms on Next.js 14 App Router and TypeScript with Express, PostgreSQL and Drizzle ORM, BullMQ/Redis job queues, and Auth.js v5, production-architected and cloud-deployed from day one.
- Designed REST APIs, PostgreSQL schemas, and background-job systems end to end, then carried them through to performant React frontends, owning every layer of the architecture.
- Delivered full-stack solutions across e-commerce, hospitality, professional services, and SaaS, owning scope, architecture, timelines, and delivery independently.
- Developed a direct booking platform with guest-facing portals, Stripe + Stripe Tax integration, webhook handling, and review workflows.

CO-OWNER / E-COMMERCE OPERATOR, POSH LOVE

Feb 2015 - Present

- Co-founded and run a custom-product e-commerce business, owning the storefront, infrastructure, fulfillment, and marketing end to end.

WEB DEVELOPER, AAA (CONTRACT)

Aug 2012 - Jan 2013

- Diagnosed and resolved bugs in a next-generation roadside-assistance dispatch platform alongside the QA team.

Notable Projects

PATHARA, AI AGENT JOB-SEARCH PLATFORM (GETPATHARA.COM)

A self-service product where candidates submit a resume and questionnaire, and an automated AI agent pipeline returns ranked job matches with a tailored resume, cover letter, and interview prep for each match, plus an application tracker.

- **Stack:** Next.js (App Router), TypeScript, Vercel, Supabase (auth, Postgres with row-level security, storage), managed AI agents, PostHog
- **Highlights:** Built the full pipeline end to end, with per-candidate data isolation, per-run cost and token telemetry, and a managed-agent design that runs without self-hosted workers

TEETIMES, MULTI-TENANT SAAS BOOKING PLATFORM

OpenTable-inspired tee-time booking SaaS for golf country clubs, built engine-first with a multi-tenant architecture.

- **Stack:** Next.js 14 App Router, TypeScript, React, Node.js, Express, PostgreSQL + Drizzle ORM, Auth.js v5, BullMQ + Redis, Zod, Tailwind CSS, shadcn/ui
- **Highlights:** Node and PostgreSQL backend with Redis-backed background jobs and multi-tenant data isolation, a React frontend on top, and an AI agent-ready workflow with a TDD task structure driving the build

MULTI-MODEL AI CODE-REVIEW TOOLING

A team-facing review system that fans a diff out to multiple AI models and synthesizes their findings into one structured scorecard with a Ship/Fix/No-Ship verdict.

- **Stack:** Multiple AI models, multi-model orchestration, structured scorecard output
- **Highlights:** Turned ad-hoc LLM review into a repeatable, auditable agent workflow that raised the bar for the whole team

Education

B.S. Web Design and Development, Full Sail University A.S. Computer Programming, Valencia Community College
